

New Product Press Release

December 18, 2012

For immediate release

Rainbow Trugs® Trug-Lid™ – the universal storage solution

When is a trug more than just something useful to move items around the garden and home? When it's partnered with one of our new Rainbow Trugs® Trug-Lids™.

The unique Trug-Lids™ fit securely and snugly onto any of our 14-litre, 30-litre or 45-litre Rainbow Trugs®, turning them instantly into a lidded container – and making them even more useful and versatile.

There are dozens of uses for Rainbow Trugs® fitted with a Trug-Lid™, but you can use them to:

- Help keep compost dry.
- Help keep large amounts of garden bird seed and other similar materials, such as stored potatoes and other vegetables, dry and secure from mice and other vermin.
- Keep a lid on home-made comfrey and nettle fertilisers – to ensure the smell stays in and improve the decomposition process.
- Use them for growing your own mushrooms – a Trug-Lid™ will keep them nice and dark!

All Rainbow Trugs® and accessories are made in the UK. The Rainbow Trugs® Trug-Lids™ are made from recycled high-density polyethylene (HDPE) and polypropylene, ensuring they are firm and rigid. So now your filled Rainbow Trugs® are stackable and will take up less space as a result. They're the perfect storage solution for so many applications in and around the house and garden. As Rainbow Trugs® are made from food-grade plastic and coloured with food-approved colourants, you can safely use them with foodstuffs and other edibles.

The 14-litre Rainbow Trugs® Trug-Lid™ costs £4.49, the 30-litre £5.49 and the 45-litre £6.49. All Rainbow Trugs® orders over £29 are delivered FREE within the UK mainland, excluding Highlands.

Notes to Editors

■ Rainbow Trugs®, the Trug-Lid™ and the full range of accessories are available mail order direct from a2z Sales, and can also be ordered online through our secure website – www.RainbowTrugs.com, where you can find out about the extensive Rainbow Trugs® range.
