From garbage to garden

With the concerns over plastics and their build-up in the environment, TDP is playing a major role in reducing the problem in the UK in the world of gardening. The company uses recycled plastic waste to create its range of garden furniture, planters and wild bird products.

The 100% recycled high-density polyethylene (HDPE) plastic comes from waste, recycled by UK residents and processed at local UK recycling plants. The products are hand-made by craftsmen in Derbyshire, creating a sustainable virtuous circle and keeping carbon footprints to a minimum.

In the six years TDP has been producing recycled garden products, it has saved 2,528,000kg of plastic waste from being sent to UK landfill; that's equivalent to more than 1.5 billion plastic bottle tops!

Great range – enormous advantages

The products are available in a range of 11 colours, from the more traditional brown and black through lilac and blue to orange and red. So, you can choose a more traditional look, or products with a real “wow” factor that truly stand out in the garden.

The range includes garden chairs, tables and benches, planters, bird tables and a nesting box. New items are being added all the time. There is also an innovative range of children's furniture, which thanks to the wide range of colours available, is particularly loved by children, younger members of the family and those “on trend” with strong colours.

With its realistic wooden grain, each product fits beautifully into any garden.

And for a more personal touch, products can be personalised and engraved - either with a plaque or within the plastic structure itself. This further increases their appeal when given as gifts or presents.

The recycled plastic components impart numerous advantages and benefits over traditional wood. These include:

- Strong, durable, impact resistant and dimensionally stable.
- Rot proof, splinter proof and crack proof.
- Insect resistant, chemical resistant, UV resistant and water resistant.
- Virtually no maintenance needed. No need to treat, varnish or paint - just wipe down with a damp cloth when needed!

● To view the full range of TDP recycled products, download a catalogue and to order online, visit www.tdp.co.uk, or call 01629 820011.

● The showroom in Wirksworth, Derbyshire, is also open for visitors to view products “in the flesh” during normal office hours.
